

What have I worked on?

Gathering the data from various sources outlined in the project document. Analyzing the data and finding three kinds of datasets- regular pay stub information, house rep contributions and overtime information.

What will I be working on next?

Begin to filter and aggregate the data to include only the information we need, and then perform preliminary analysis.

Have I run into any issues? Do I need help?

Not at the moment, but would appreciate more communication and instruction with the project

Team Lead: Have I talked to the client recently? When are we meeting with them next?

No I haven't, I've talked with our spark coordinator but not directly to the client. Attempted to go to meeting outlined on slack but no one showed up
